Front-end Web Programming - Project

You will create a personal website for your project using HTML5, CSS3, Bootstrap, and Javascript.

There should be the following pages/elements on your website:

- Homepage (5%)
- Contact page (5%)
- About page (5%)
- My work page (Portfolio page) (5%)
- Services page (if you like to do freelance work) OR Blog page (5%)
- Thoughtful placement of the elements of the page e.g. buttons, menus, etc and having links to different social media platforms e.g. LinkedIn (5%)
- Proper use of fonts, colors, and overall design (5%)
- Making the pages dynamic using JavaScript (5%)

The repository should be uploaded on GitHub and there should be frequent commits as the project is being developed. **There will be a 5% grade loss if these criteria are not fulfilled.**
